“ *Mike was hired as one of BioKyowa's original operators on January 31, 1984. Mike held several jobs at the company over his 22-year career. He began working at our wastewater treatment facility before promoting into production as an operator in the extraction section. He would be promoted several more times to increasingly more responsible areas that were in fermentation and finally in the control room operating from the DCS.*

*Mike retired from the company on December 31, 2006. During his retirement years he would attend various company gatherings including picnics and Christmas parties. Mike had a one of a kind personality that no one could forget and a great ability of bringing humor into most situations that would have others laughing out loud. Rest in peace Mike!*
